

Resource List: Using AI in the Classroom

[Diffit.com](https://diffit.com)

An AI platform that helps teachers adapt and differentiate instructional content. It can rewrite texts at different reading levels, generate vocabulary lists, summaries, and questions, and produce print-ready or PDF materials so all students can access grade-level content more easily.

[LilysAI.com](https://lilysai.com)

An AI multimodal summarization and research assistant that ingests videos, audio files, PDFs, webpages, and text and outputs structured summaries, notes, mind-maps, and insights. It also supports translations, citations back to source material, and exports to common formats, making it useful for study and research workflows.

magicschool.ai

A teacher-focused AI platform with tools to automate lesson planning, generate rubrics and assessments, differentiate content, draft communications, and more. It offers a large library of searchable AI tools designed specifically for education tasks, helping educators save time on planning and administrative work.

[Google NotebookLM](https://notebooklm.google.com)

An AI-powered *research and note-taking assistant* in the Google ecosystem. Educators and students can upload content (documents, slides, PDFs) and use AI to summarize, generate study guides, questions, and insights grounded in those materials. In Classroom it can become an interactive study tool tied directly to class resources.

[DitchThatTextbook.com](https://ditchthattextbook.com) / AI tools list

Not a single AI itself, but a curated *collection of AI tools for educators* on the Ditch That Textbook blog. It highlights and describes a wide range of generative AI tools (including some of the ones above) to support planning, differentiation, assessments, classroom engagement, and productivity.

[BriskTeaching.com](https://briskteaching.com)

A Chrome/Edge extension and AI assistant that embeds directly into tools teachers already use (like Google Docs, Slides, Canvas, and LMS platforms) to generate materials, provide feedback, analyze writing, adjust reading levels, and help create differentiated assignments without leaving the interfaces you already work in.

euria.infomaniak.com

A *sovereign AI assistant* from Infomaniak, hosted in Switzerland with strong privacy and data protection. Euria helps with writing, summarizing, translating, analyzing and transcribing documents and communications, and answering questions — all while keeping data private and powered by renewable energy.
